

# N&C

## Nicobond

# Plastic Ply

### Timber Floor reinforcing sheet

A revolutionary solution to fixing tiles and Natural Stone to timber floors. Prevents problems of damage to tiles by reducing the effects of timber shrinkage, warping and rotting. Eliminates the need to install thick sheets of Marine Grade plywood (min 15mm) or similar over-boarding products.

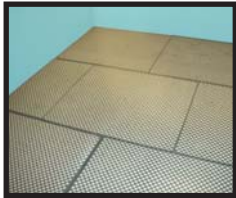

1. Ensure floor is clean and dust free.

2. Prime timber and allow to dry

3. Remove release paper

4. Fix 'brick-bond' to floor.

5. Cut using scissors

6. Cover Plastic Ply with Nicobond Rapidflex adhesive

7. Fix tiles

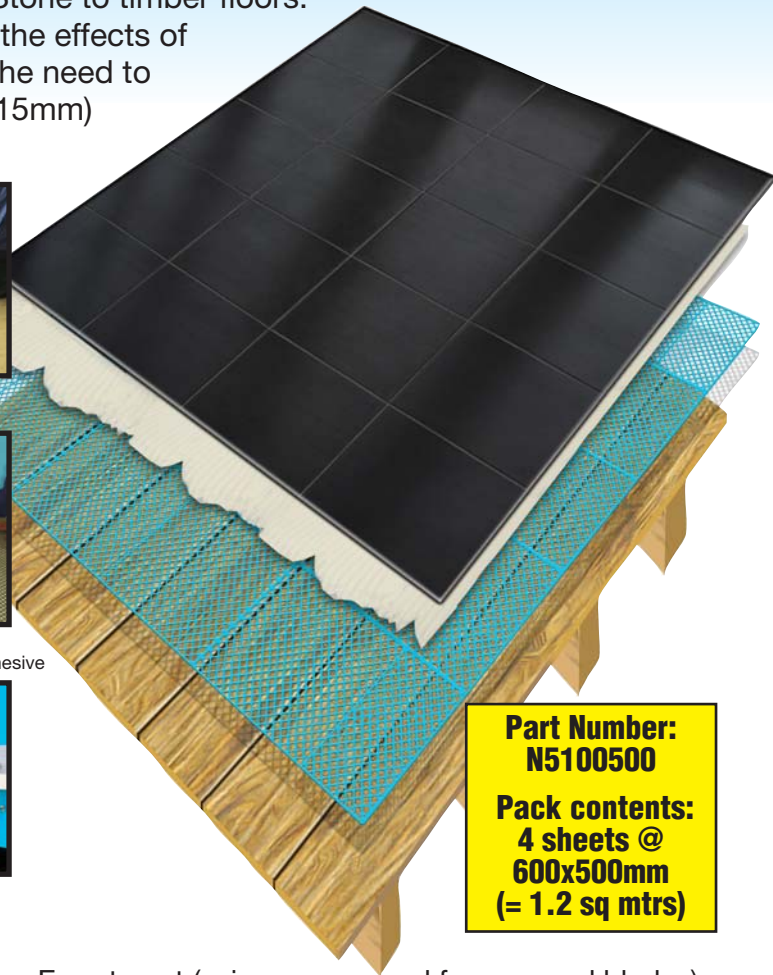

8. Grout using Nicobond Rapidflex grout

9. Finished room

### Benefits:

- Self-adhesive
- Manufactured using 50% recycled plastic ingredients
- Ultra thin (no more steps/reducing door heights)
- Reduces stress on tiled floor
- Moisture proof
- Easy to handle
- Heat resistant (suitable for undertile heating)
- Easy to cut (scissors, no need for exposed blades)
- Easy to install (requires no skilled labour)
- Impact resistant
- Cost effective
- No drilling
- Ready to tile immediately (no curing/drying time)
- Speedy installation/time saving

**Part Number:**  
N5100500

**Pack contents:**  
4 sheets @  
600x500mm  
(= 1.2 sq mtrs)

## “The easy way to tile over timber floors”

**Recommended adhesives/grouts;**  
Nicobond Rapidflex Grey or White  
Nicobond Rapidflex Grout (Grey or Charcoal)

The Nicobond Rapidflex adhesive should be trowelled into the surface of the Plastic Ply ensuring the mesh is filled; the surface should then be lightly combed prior to fixing tiles. Once fully cured, grout the tiled floor using Nicobond Rapidflex Grout.

### IMPORTANT NOTES:

Existing wooden floors must be rigid, stable and capable of supporting additional load without flexing and have sufficient ventilation beneath them. Any loose boards should be secured prior to applying N&C Nicobond Plastic Ply. If there is excessive flexing or movement within the floor the addition of extra noggins may be required.
