ScreedPro Rapid Repair Mortar

A high strength cement based rapid repair mortar which is rapid setting, rapid hardening and is ideal for repairing internal concrete or cement screed floors prior to the application of other surface treatments.

Features

- Rapid setting
- Foot traffic 30 minutes
- Slump free
- Dries in 30 minutes hours
- Rapid hardening in 30 minutes
- Can be used under water
- Used for stair treads and risers
- Perfect for repairing concrete
- Protein free
- 10kg

guarantee

The compound shall be ScreedPro Rapid Repair as manufactured by N&C Building Products Limited, 41-51 Freshwater Road, Chadwell Heath, Romford, Essex, RM8 1SP, England. Tel: 020 8586 4600 and shall be applied strictly in accordance with the manufacturer's current data sheets and instructions.

British Standard - Guidelines

All aspects of the installation must be in accordance with the requirements of BS 8204, BS 8203 (Installation of Resilient Floorcoverings) or BS5325 (Installation of Textile floor coverings). Complies with EN standards and supplementary specifications.

Description

ScreedPro Rapid Repair Mortar is a high strength, rapid setting and hardening cement based repair product, which is ideal for Repairing internal concrete or cement screed floors prior to the application of other surface treatments.

It produces a thixotropic and non-slump mortar which can also be used for general repairs to stairs and steps and also for plugging holes in floors walls and floors as well as making patch repairs prior to the application of a damp proof membrane .

Can be used for pointing brickwork, rendering sills, fixing gate posts, brackets and catches.

Underwater repairs may be carried out with this material. Fish Ponds require special treatment before stocking with fish (as normal practice for aquatic structures).

Mixing

Add 1.8 litres of clean water in to a clean suitable container. The powder should be added at a steady rate, while stirring continuously using a variable speed mechanical mixer on slow speed. The material should be mixed until a stiff paste is achieved.

Note: Only make up small amounts using the above ratios or measure by volume approximately 3 – 3½ parts of powder to 1 part of clean water which can be used within the rapid setting time.

Application

Thoroughly wet the area to be treated with clean water just before application. Use mixed product immediately.

Trowel ScreedPro Rapid Repair smooth just before the material sets (usually within 20 minutes on warm days but longer in cold weather).

Use neat ScreedPro Rapid Repair for underwater repairs, mix thicker than normal to avoid dispersal in the water. Hardening time approximately 30 minutes depending on ambient temperature and site conditions. Hardening time will be considerably increased when sand is added to the mix.

How much material?			
Applied Thickness	Approximate Coverage Per Bag	Consumption Per 100m ² Area	Aggregate
2m	3.5m ²	28 bags	n/a

The table should be used for guidance purposes only and all information given can be affected by the substrate texture and absorbency. The coverage given is based on a smooth non absorbent subfloor.

Tools

Suitable steel smoothing trowel, mixing bucket, electric drill and power whisk.

Cleaning

Wash tools with water immediately after use.

Shelf Life

12 months in unopened bags from the date of packing.

Storage

This product must be stored clear of the ground, under dry conditions, out of direct sunlight. Protect from frost. If allowed to freeze N&C Building Products cannot guarantee the performance of the product.

Health & Safety Advice

ScreedPro Rapid Repair is classified under the Chemicals (Hazard Information and Packaging for Supply) Regulations.

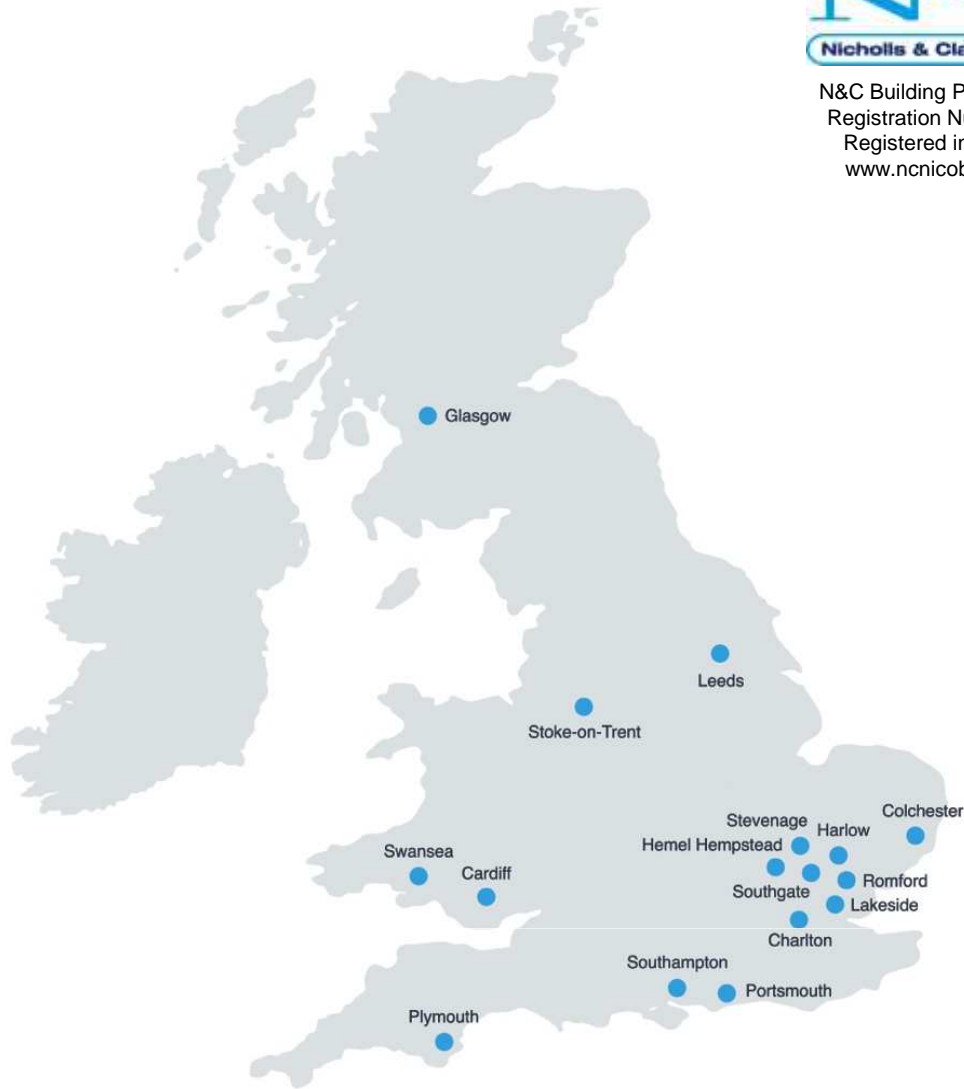

ScreedPro Rapid Repair contains cement, (contains Chromium VI), may cause an allergic reaction. Contact with water causes an alkaline reaction which may cause skin irritation and/or caustic burns to mucous membranes.

Wear suitable protective clothing, gloves and eye/face protection.

Keep away from children.
