Plain Colour Tile & Vinyl Range

The Nicholls & Clarke Group is a business dedicated to the manufacture and supply of the finest building materials. Founded in 1875 in London, we have grown from servicing the capitals' building trades to becoming the largest privately owned national manufacturer and distributor of fine quality building products.

Quality manufacturing is at the core of our business and comes as standard. We own state of the art manufacturing facilities based across the UK and Central Europe. This gives us the broadest manufacturing capability available, allowing us to offer an extensive portfolio of product, more specialised than that of any of our competitors.

Our distribution network is supported with our private fleet of over 110 commercial vehicles. This gives us full logistical control from the point of manufacture through to delivery to site. We offer a nationwide delivery service, be that to site, home or commercial address. The vast majority of our deliveries are made on a next day basis.

Nicholls & Clarke Group

Ikon plain colour range

Our Nicobond Ikon collection is the longest established plain colour wall tile range in the UK. With over 40 colours, 4 popular sizes, multiple finishes and high stain resistance, we offer an unrivalled solution to local authorities, housebuilders, housing associations and a wide range of other residential and commercial projects. With huge stocks and immediate availability, we are the preferred supplier to our customers all over the UK.

Our core range of colours have been specified in the UK for over 30 years showing our commitment to ongoing supply, availability and pedigree. The Nicobond Ikon Plain Colour Range conforms to BS EN14411 (2012) and offers high stain resistance for peace of mind.

Before fixing, please ensure that the tiles purchased are of the same batch as no responsibility can be accepted after the tiles have been fixed. We recommend that all ceramics should be fixed using N&C Nicobond adhesives, grouts and accessories. N&C Nicobond recommend that all ceramic tiles are installed according to the N&C Nicobond 'Tiling Solutions' Guide and in accordance with BS5385.

Around 2 million people in the UK have vision impairment. It is therefore essential to design and maintain people's homes and commercial environments to address this. Using colours that reflect light and contrasting colours help to differentiate objects/walls from a surrounding helping to make most of a person's sight. Ceramic wall and floor tiles with skirting tiles must match the walls in order to meet the recommendations of BS8300 which states 'Whilst there is considerable confidence in recommending a difference in LRV (Light reflective value) of 30 points or more (the good zone) there is also some evidence to suggest that a difference of around 20 points might still be acceptable, provided the illuminance on the surfaces is 200 lux or more.
